Review - That was Tire Technology Expo 2020

Also in this year Benninger Zell GmbH successfully participated at the Tire Technology from 25. - 27. February 2020 in Hannover, Germany.

The visitors were able to experience the latest product presentations and innovations from over 300 exhibitors as well as fascinating lectures live.

With our trade fair motto „Benninger Laboratory Single End Machine“ and our exhibit we were able to attract many known as well as unknown customers / interested parties to our stand to talk about current and future projects.

We would like to thank all participants for their support and successful participation at the fair.
